Cerence Builds Global Momentum with Multiple Industry Award Wins in China

November 8, 2021

Premier cloud-based conversational AI portfolio and strong understanding of international markets earn Cerence top honors

BURLINGTON, Mass., Nov. 08, 2021 (GLOBE NEWSWIRE) -- Cerence Inc. (NASDAQ: CRNC), AI for a world in motion, today announced it has been recognized across multiple award programs in China for its advanced AI technology. Underscoring the company's global momentum, the nominations credit Cerence as having a strong understanding of the international market and a flexible, cloud-based approach that together enable OEMs to deliver powerful, intelligent in-car experiences across regions and cultures.

China AI Jin Yan Awards

The China AI Jin Yan Awards presented by the AI Committee of China Electronics Chamber of Commerce recognizes outstanding achievement and contribution for AI development in China. More than 200 AI companies from different fields participated in this year's competition, evaluated by a jury made up of senior Chinese AI experts and fellows from leading science and engineering academic bodies around the world.

Cerence's cloud products and services for automakers were awarded the **2021 China AI Innovative Award** at this year's event, held at the China AI Annual Conference & China AI Jin Yan Awards Presentation Ceremony in Hengyang City, Hunan, China. The company also was honored with the **2021 China AI Innovative Enterprise Award** for its leading voice AI technology and strong local development capabilities.

2021 Gaogong Intelligent Car Golden Globe Award

The Gaogong Intelligent Car Golden Globe Awards were announced at the Gaogong Intelligent Automobile Developers Conference in Shanghai. Cerence was recognized with the **Leading Intelligent Voice Supplier Award**, selected based on an analysis of OEM production data, project type, user satisfaction and market awareness.

"Critical to the global success of any voice AI assistant is its ability to provide consumers, across continents and cultures, with a personalized, convenient experience," said Charles Kuai, SVP & GM, Mobility Solutions, Cerence. "We see internationalization as a major trend in the mobility space and are focused on providing flexible cloud and embedded solutions that can help automakers enable the next generation of intuitive and user-friendly in-car experiences, especially as they expand to new markets. We are honored to have received these awards, and I am proud of our team for continuing to push the boundaries of what's possible when it comes to AI technology that knows no borders."
